

# MDFR 12 Lead Radio Transmissions

1. "I have a diagnostic 12 Lead ECG"
2. "There are ST elevations present in the following leads"
  - \_\_\_\_\_
  - (insert leads and how many mm of elevation in each lead)
3. "There is reciprocal ST depression in the following leads"
  - \_\_\_\_\_
  - (Name the leads with ST depression)

Anatomic locations based on the ECG leads involved defined as follows:

- Septal = leads V1 and V2
- Anterior = leads V3 and V4
- Lateral = leads V5, V6, I, and aVL
- Inferior = leads II, III, and aVF
